

MUNICIPAL SOLUTIONS

For AUTOMATED PARKING ENFORCEMENT

Cities face numerous parking enforcement challenges when managing **visitor, short-term and resident parkers**. The high volume and quick turnover of vehicles parking and departing, combined with limited enforcement resources and adverse weather conditions, make it nearly impossible for officers to enforce parking regulations effectively.

In many municipalities, the violation capture rate by officers is less than 10%.

Through advanced technologies and the latest trends in city parking management, WISESIGHT directly addresses these issues by automating enforcement with real-time payment and permit verification for parking spaces, curbs, and lots, including monitoring overtime parking utilization and trend data. This results in a 100% violation capture rate, increased enforcement efficiency, improved payment compliance, and a significant boost to revenue generation for parking operations.

Revolutionizing Parking Enforcement with AI-Based Imaging

WISESIGHT's AI-powered automated parking enforcement platform transforms the way municipalities manage and enforce parking. By capturing real-time, detailed information about parked vehicles—including parking space location, license plate number, parking duration, zone restrictions, and payment compliance—our platform ensures that every violation is tracked and registered, with officers being alerted in real time, all without human intervention.

Additionally, WISESIGHT's focus on safety features helps create a more secure environment for both drivers and pedestrians. By implementing WISESIGHT, cities can optimize their parking operations and provide a more user-friendly parking experience.

Key Features

Automatic

- 24/7 parking session monitoring
- Payment violation verification
- Occupancy, counts and statistics
- Enforcement integrations

Additional

- Personal & property safety
- Enforcement efficiencies
- Ticket-by-mail Enabled

Applications

Off-street parking

- Surface lots
- Garages

On-street parking

- Curbside parking
- Loading zones

Parking utilization data

- Detailed visualization of parking assets, utilization by space, patterns, violations, revenue potential, and payment compliance
